Willard Marine Announces ISO9001 Certification

March 1, 2010, Anaheim, CA: Willard Marine Inc. announced today that the Anaheim manufacturing facility has been granted ISO9001 certification. Included are the company's design/engineering, manufacturing/assembly and testing facilities. The procedure involved both management and staff participating in intense training and the development of quality and training documents and procedures to provide continuous improvement in the company's manufacturing processes.

"With the implementation of ISO 9001 standards and the resulting certification Willard Marine has taken the necessary steps to continue our commitment to excellence", stated Debbie Andrews, QA Manager of Willard Marine Inc.

Willard Marine, Inc. headquartered in Anaheim, California, established in 1957 is a leading builder of high quality boats. These boats are specialty marketed to government, law enforcement and commercial customers throughout the world. Backed by state-of-the-art design, manufacturing and testing processes, Willard Marine, Inc. prides itself on building high performance composite and heavy duty aluminum boats. Willard Marine is ISO9001 certified. Classified as "Small Business" by the United States Government, all products are included in the company's GSA contract, GS-07F-0123H.
