The Anaheim, California, Willard Marine facilities, with their modern manufacturing and testing equipment for high-tech composite and aluminum boats, have a CAD engineering department where marine design and manufacturing projects are handled with expertise, ingenuity and enthusiasm. The company's technology and construction expertise continues to set industry standards. All boats are sea-trialed and tested in the water at company leased facilities in Long Beach Harbor, California before shipment to destination.

Configuration management is exercised on multiple boat contracts. All boats meet the American Boat and Yacht Counsel (ABYC) Standards and Recommended Practices.

Willard Marine, Inc. is classified as a "Small Business" by the U.S. Government and is an Equal Opportunity Employer with an Affirmative Action Program. All products are included in the company's GSA contract, GS - 07F - 0123H.
